### DETAILED ACTION

1. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Izubayashi et al (EP 320594) in view of Tsai et al (WO 9737078).

The claims are rejected for the reasons given in the previous Office Action, Paper No. 6.

2. Applicant's arguments are deemed unpersuasive of patentability.

Contrary to Applicant's assertions, Izubayashi et al does show the claimed oligomer used to disperse or emulsify particles of carboxylic acid monomer copolymerized with other monomers, these particles correspond to the claimed "matrix" polymer. Polymer IIa of Izubayashi et al has a molecular weight of 300-7000, which is inclusive of oligomers (page 5). The polymer is polymerized from a monomer mixture of unsaturated carboxylic acid and another monomer such as (meth)acrylamide (1<sup>st</sup> paragraph, page 6) and contains terminal alkylthio group introduced by reaction with an alkyl mercaptan, page 6.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1731

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
